PREFACE

01-04-2026

Cardiovascular and thoracic surgery demands uncompromising precision, where the margin for error is non-existent. At **Chatterjee Surgical**, we understand that behind every successful operation is a set of instruments that a surgeon trusts implicitly.

This catalogue represents the culmination of decades of research, development, and close collaboration with leading cardiothoracic surgeons worldwide. We are proud to present a comprehensive range of surgical tools designed for the highest demands of heart and lung surgery—from traditional bypass procedures to the most delicate paediatric interventions.

Our commitment is to quality, using premium materials to ensure reliability, durability, and ergonomic perfection. We hope this collection assists you in achieving optimal patient outcomes.

Driven by the goal of enhancing precision in the operating room, our instruments are crafted to be an extension of the surgeon's hand. We invite you to explore our new solutions, designed not just to meet the standards of today, but to set the trends of tomorrow.

I hope this catalogue will be of assistance to the medical profession as well as to dealears in this trade.

Sincerely
Subir Chatterjee
